**FOR IMMEDIATE RELEASE**

## **Dynamic Feeds and Robert Allred Join The Minster Machine Company**

MINSTER, OH -- The Minster Machine Company Executive Vice President David Winch announced today that Minster has acquired the assets of Dynamic Feeds, Inc. of High Point, NC. In addition Robert Allred, the founder of Dynamic Feeds, has joined The Minster Machine Company as the General Manager of Marketing and Sales for the Automation Division located in Beaufort, SC.

"The addition of Dynamic Feeds to Minster instantly expands our product offering while also opening up many new opportunities for continued growth," Winch said. "More importantly, Robert Allred joining the Minster family brings 30 years of global experience and relationships to our business."

Allred founded Dynamic Feeds in 1977 with two models of mechanical feeds developed by his grandfather for use in the family stamping business. During the next 30 years Dynamic Feeds has grown to become a global supplier of customized material handling machinery and systems for the metal forming industry.

"Selling the business to Minster and joining the Company is a perfect fit for our many valued customers around the world," Allred said. "The Dynamic products will now be supported by Minster's global service and parts network. Our customers can expect to be treated with the best service and parts support in the machine tool industry. In addition, the opportunity to expand the total product offering is greatly enhanced by Minster's excellent engineering resources."

As a unified company, Minster and Dynamic will provide products that will continue as unique brands servicing a large segment of the material forming and industrial automation business.

Headquartered in Minster, Ohio, The Minster Machine Company is a diversified portfolio of businesses focused on industrial machinery, automation, manufacturing, and global services. Products include metal forming presses, material handling/coil processing equipment, equipment services, and manufacturing sourcing. The Minster Machine Company was founded in 1896 and has more than 40,000 machines located in more than 70 countries around the world.
